

**AMERACASH SOLUTIONS INC. AND iSEND ANNOUNCE
STRATEGIC ALLIANCE**

Strategic partnership will allow real-time payments to international utility companies

(Watertown, CT) - iSend, LLC., a leading provider of global electronic transaction processing solutions, announced today it has agreed to a strategic alliance with AmeraCash Solutions, Inc. (ASI) to provide payment processing services for international utility companies. The new venture will operate under the name International Express Pay.

The International Express Pay logo is part of the new branding program that evolved from the strategic alliance of ASI and iSend.

Under the terms of this partnership, iSend will make its International payment processing services available to ASI's expansive retail agent network. Through walk-in bill payment, paying by phone, or sending a check over the Internet, AmeraCash Solutions, Inc. offers the un-banked and under-banked customers an alternative to regular financial methods. iSend compliments this service by allowing consumers to pay utility and other bills in countries such as Mexico, Brazil, Guatemala, Honduras and El Salvador.

International Express Pay recently opened in ten retail locations throughout the Philadelphia area offering payments in 24 hours or less at a very low cost. AmeraCash and iSend intend to expand International Express Pay throughout the U.S.

This strategic alliance benefits segments of the international bill payment market, including the consumer, the retail-agent and international billers. The alliance connects payers residing in the U.S. with Latin American countries.

"We are pleased to be working with a leading provider of global electronic payment processing solutions. Being a part of a strong company that understands our business will be welcomed by our merchant customers and provide new opportunities for ASI," said ASI CEO Joe Heller. "We expect to focus on growing the customer base by providing an expansive range of payment solutions."

"The creation of International Express Pay builds on our relationships with billers and wireless carriers in Latin America," said iSend president and CEO Steve LaBella. "Through the combination of ASI's extensive agent retail network and experience in transaction processing, we see a great opportunity for the future of alternative financial transaction methods," added LaBella.

LaBella believes the two companies can supply retail agents with a comprehensive technology system that comes with IT experts to solve real-time consumer payment issues at very competitive prices.

"Through this relationship we are able to provide seamless technology for an integrated system of bill processing which places the control of bill payment in the hands of the U.S. consumer who is paying bills in Mexico and other foreign countries," Heller added.

About AmeraCash Solutions, Inc.

AmeraCash Solutions, Inc. (ASI), a certified diverse supplier, has been providing alternative financial solutions to major utilities, municipalities, retailers and businesses for over 14 years. ASI utilizes a retail network for the un-banked and under-banked consumer by way of real-time processing of transaction data.
